RE: Dixon Road Site
1140 South Dixon Road, Kokomo, Howard County, Indiana
Site Spill Identification Number: C5M5
General Notice of Potential Liability

Dear Sirs:

The U. S. Environmental Protection Agency has documented the release or threat of release of hazardous substances, pollutants and contaminants into the environment from the Dixon Road Site, and is planning to spend public funds to investigate and control these releases. This action will be taken by EPA pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA), 42 U.S.C. §§9601- 9675, unless EPA determines that such action will be done properly by a responsible party or parties. Responsible parties under CERCLA include the current and former owners and operators of the facility, persons who generated the hazardous substances, and persons who were involved in the transport, treatment, or disposal of the hazardous substances at the Dixon Road Site. Under Section 107(a) of CERCLA, where EPA uses public funds towards the cleanup of the hazardous substances, responsible parties are liable for all costs associated with the removal or remedial action and all other necessary costs incurred in cleaning up the Site, including investigation, planning, and enforcement costs.

EPA is currently planning to conduct the following actions at the Dixon Road Site:

1. Develop and implement site plans including a site-specific Health and Safety Plan, an Emergency Contingency Plan, and a Work Plan, including an Air Monitoring Plan;
2. Determine the extent of buried drums and contamination in soil;

3. Conduct a comprehensive site assessment and engineering evaluation to evaluate potential control and/or removal options to control, contain, and/or remove drums, waste, and contaminated soil;
4. Implement the selected control and/or removal action as approved by EPA;
5. Consolidate and package hazardous substances, pollutants and contaminants for transportation and off-site disposal in accordance with the EPA Off-Site Rule 40 C.F.R. § 300.440; and
6. Take any other response actions to address any release or threatened release of a hazardous substance, pollutant or contaminant that the EPA On-Scene Coordinator determines may pose an imminent and substantial endangerment to the public health or the environment.

EPA has received information that your organization may have owned or operated the Dixon Road Site or generated or transported hazardous substances that were disposed of at the Dixon Road Site. By this letter, EPA notifies you of your potential liability with regard to this matter and encourages you, as a potentially responsible party, to agree to reimburse EPA for costs incurred to date and to voluntarily perform or finance the response activities which EPA has determined or will determine are required at the Dixon Road Site. EPA is willing to discuss with you the entry of an appropriate administrative consent order under which you would perform or finance response activities and reimburse EPA for its costs.

If a consent order cannot be promptly concluded, EPA may issue a unilateral order under Section 106 of CERCLA, requiring you to perform specified work. Under Sections 106 and 107 of CERCLA, you may be liable for reimbursement of EPA's costs, for statutory penalties, and for treble damages for noncompliance with such an order. If you are a qualified small business, enclosed is a *U.S. EPA Small Business Resources Information Sheet*, which may be helpful if you are subject to an EPA enforcement action.

Because of the conditions described above, EPA believes that response activities at the Dixon Road Site must be initiated as quickly as possible. Therefore, EPA does not intend to utilize the special notice procedures available under Section 122(e) of CERCLA.

As a potentially responsible party, you should notify EPA in writing within fifteen (15) days of receipt of this letter of your willingness to perform or finance the activities described above and to reimburse EPA for its costs. Your response should be sent to:

U.S. Environmental Protection Agency, Region 5
Attn: Ms. Sally Jansen, Enforcement Specialist
Superfund Division
Enforcement Services Section 1, SE-5J
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

If EPA does not receive a timely response, EPA will assume that your organization does not wish to negotiate a resolution of its potential responsibility in connection with the Dixon Road

Site and that your organization has declined any involvement in performing the response activities.

Your response should indicate the appropriate name, address, and telephone number for further contact with you. If you are already involved in discussions with State or local authorities or involved in a lawsuit regarding the Dixon Road Site, you may continue such activities as you see fit. This letter is not intended to advise you or direct you to restrict or discontinue any such activities already underway; however, you are advised to report the status of those discussions or actions in your response to this letter and to provide a copy of your response to any other parties involved in those discussions or actions.

Address technical questions to On-Scene Coordinator Shelly Lam at (317) 308-3073 or by e-mail at lam.shelly@epa.gov. You may also have your counsel contact Associate Regional Counsel Maria Gonzalez of the EPA Office of Regional Counsel at (312) 886-6630 or by e-mail at gonzalez.maria@epa.gov.

Due to the nature of the problem at this facility and the attendant legal ramifications, EPA strongly encourages you to submit a written response within the time frame specified herein. We hope you will give this matter your immediate attention.

Sincerely,

Jason El-Zein, Chief

Emergency Response Branch 1

U.S. EPA Small Business Resources Information Sheet

The United States Environmental Protection Agency provides an array of resources, including workshops, training sessions, hotlines, websites and guides, to help small businesses understand and comply with federal and state environmental laws. In addition to helping small businesses understand their environmental obligations and improve compliance, these resources will also help such businesses find cost-effective ways to comply through pollution prevention techniques and innovative technologies.

EPA's Small Business Websites

Small Business Environmental Homepage - www.smallbiz-enviroweb.org
